1 12. (Previously Presented): The video game input device as claimed in Claim 10, wherein the  
2 hand-held controller comprises a pair of push buttons formed on the top face of the main  
3 body, a pair of handgrips formed on opposite ends of the main body, and a power cord  
4 extending from the rear face of the main body for electrically connecting the hand-held  
5 controller to the video game system.

1 13. (Canceled).

1 14. (Currently Amended) The video game input device as claimed in Claim [[13]] 12,  
2 wherein the adapter comprises a retractable handle outwardly extending from one of the  
3 two arms, a rotatable knob outwardly extending from the other of the two arms, a rod  
4 inwardly extending from each of the handle and the knob into the receiving space, and an  
5 end portion perpendicularly extending from each rod, each end portion being positioned  
6 proximate the control buttons formed on the corresponding projection of the hand-held  
7 controller whereby manipulation of the knob and handle causes the end portions to  
8 activate the corresponding control buttons.

1 15. (Original): The video game input device as claimed in Claim 14, wherein the adapter is  
2 used with a video game having an animated onscreen character, the main body of the  
3 adapter corresponding to a head of the character, the arms of the adapter corresponding to  
4 the arms of the character whereby pulling the handle away from the main body of the  
5 adapter causes the character to pull an onscreen object and rotating the knob causes the  
6 character to spin an onscreen object.

1 16. (Currently Amended): An interactive video game controller adapter having a lip for  
2 detachably engaging with a hand-held video game controller, the interactive video game  
3 controller adapter comprising a body shaped to represent the unique characteristics of a  
4 video game and having a receiving space for receiving the hand-held video game  
5 controller, the interactive video game controller adapter further comprising at least two  
6 arms extending from the body to manipulate and activate control buttons on the a hand-  
7 held video game controller and thereby manipulate images of a video game on a remote  
8 screen coupled to the hand-held video game controller and having a cutout defined in  
9 each arm for receiving the hand-held video game controller.
